

Precise, natural writing experience

DELL ACTIVE PEN – PN557W

Draw and write naturally with accuracy

Write your next document and draw your next self-portrait with smooth precision and accuracy on screen with the Dell Active Pen - PN557W. With up to 2,048 levels of pressure sensitivity, the pen is like a natural extension of your hand, picking up the slightest nuances of pressure. You'll be able to create strokes of varying lightness or darkness with a level of control that a mouse can't even come close to providing. Plus, you'll be able to rest your palm comfortably on the screen without having to worry about potential errors thanks to palm rejection technology.

Enhance your productivity

The pen is intuitive to use and designed to make your drawing and writing more productive than ever. Click the customizable* top button to instantly launch OneNote, capture a screen shot or activate Cortana. Use the two customizable* barrel buttons to efficiently erase or launch the select arrow/context menu. You'll also be able to conveniently take notes by writing on the locked screen.

Enjoy peace of mind

When you're done writing and drawing, simply snap your magnetic pen onto your laptop or securely attach the pen to your laptop with a pen tether so you won't lose your pen when you're not using it. Be productive longer and enjoy peace of mind with 12 months of battery life**.

Precise operation

2048 levels of pressure sensitivity capture your every stroke naturally.

Natural experience

Palm rejection technology lets you comfortably rest your palm onscreen.

Warranty

Rest assured that your PN5517W is protected by Dell's 1-year Limited Hardware Warranty.

*To customize, please install "Active Control Panel" from dell.com/support/drivers

**Based on 3 hours daily usage for 5 days a week with AAAA battery
